Age Range Expansion for Pneumococcal 20-Valent Conjugate Vaccine

Key Details:

Effective for dates of service on or after September 1, 2023, the age range for procedure code 90677 was updated to individuals who are 2 months of age or older for Texas Medicaid and CHIP. Since this vaccine is distributed by the Texas Vaccines for Children (TVFC) Program, procedure code 90677 will process as informational-only when administered to individuals who are 2 months through 18 years of age.

PCHP will reprocess affected claims submitted with this procedure code and date of service on or after September 1, 2023.

Providers are not required to appeal the claims unless they are denied for additional reasons after the claims reprocessing is complete. Providers may bill PCHP retroactively for vaccine procedure code 90677 and related vaccine administration procedure code.

Action:

PCHP will update our system and processes to reflect code updates and inform impacted providers in PCHP network about any code updates.
